

MAYOR'S REPORT  
OCTOBER 2010

With summer over, we move in to fall, looking back at many projects we accomplished so far this year. Maple Grove slope repair was finally completed, two weeks after school started and we can finally get things back to normal with our bus routes and motorist travel. Thanks to everyone for their patience during this trying time.

The work on Route 91 near the I-90 interchange is nearly complete. It will be nice to have the synchronized signaling to make travel down Route 91 smooth and uninterrupted.

Work continues in Area C for sewer installation. This is an ongoing project that we will work closely with the affected residents on until completion.

The Halloween Party brought out many of our residents to celebrate this fun holiday. Special thanks to our Girl Scout Troop volunteers and all those helped to make it such a success.

Next month marks the beginning of our Fall Leaf Pickup Program. Please remember to get your leaves out to the edge of your property for pickup. The pickup will be ongoing until the snow begins.

Our City Newsletter made its way to Willoughby Hills households recently. I am pleased with the results and thought it contained a lot of news for our residents. Special thanks to the businesses that made this newsletter possible with funding.

I look forward to the election results next month to be able to plan for our future. Please feel free to let me know if you have any questions or concerns before going to the polls.
